

Video Drivers

This Technote relates to the ALR 7000, 8000, 7200, 8200, 7300, and 8300 systems equipped with integrated video. Included with your system is a Cirrus Logic Window NT 4.0 v1.40 diskette. When loading your video drivers we strongly recommend that you use the drivers provided on the Cirrus diskette and NOT the ones on the Windows NT CD-ROM. The drivers on the Windows NT CD-ROM may contain a bug that will not work with your system.
