

CPU Microcode Message

This Tech Note applies to the 7200, 8200, 7300, and 8300 systems. Run the MULOADER utility if the error message “update table not found for CPUxx, Stepping xxxx” displays at boot up. This message may occur under the following conditions:

When a new processor has been added that does not include the stepping information in the table.

When the BIOS is flashed, it may remove the stepping information from the table which will cause the error message to appear.
